# SLA-70B Signature

65 Watt/Channel Class A/AB Stereo Amplifier

CARY  
Audio Design

## A New Vision in Music and Technology.

**There are many reasons to own the SLA-70B Signature.**

**Performance.** This tube amplifier from Cary Audio Design has led the way in redefining high-end audio since it was first introduced five years ago. With 60 watts of power per channel, the SLA-70B Signature delivers extraordinarily clean, crisp sound to the most demanding speakers on the market.

**Craftsmanship.** This is undeniably a beautiful amplifier. From its low profile black chassis, to the large wax-impregnated output transformers, Cary Audio Design has overlooked no detail of construction.

**Pride.** Every time you enjoy your favorite performances, the 70B Signature will remind you of the importance of demanding the best the world of high-end audio can offer.

These are all good reasons to own the 70B Signature. But there is one reason that is more important than any other. It is simply *because you love the music.*

The SLA-70B Signature will change the way you listen to music.

At its best, music is a special relationship, an intimate experience shared by just two people: the

listener and the performer. Too many manufacturers are indifferent to this relationship. But, for Cary Audio Design, it is their guiding principle, their *raison d'être*. And the reason for their success. Music is emotion, feeling, a way to be transported. And Cary has engineered the 70B Signature to transport you *inside the music* - to a place where you experience full, focused lows, sensuous, delightfully detailed mids, clear, soaring highs.

With the SLA-70B Signature you'll experience a most realistic reproduction of the actual performance.

Cary Audio Design knows that the best amplifiers are virtually transparent. The SLA-70B Signature is so transparent you'll think it's invisible. It don't color the sound at all. Cary has carefully selected components for their quality and reliability, and uses circuit techniques which eliminate any discernible crossover notch at low levels. Each amplifier is hand wired point-to-point and is burned in at the factory for a 48 hour period. Just unpack, hook up, and enjoy.

Experience the 70B signature. We believe it will change the way you listen to music. *Forever.*

### Unit Specifications:

<b>Weight:</b> 42 lbs.	<b>Power Transformer(s):</b> 1 ea EI Laminare, 200% Duty	<b>AC Power Requirements:</b> 117/234 Volts 50-60 Hz
<b>Dimensions:</b> 7" H x 13" W x 12"D	<b>Output Transformer(s):</b> 2 ea EI Laminare, Ultra Linear, 200% Duty	<b>Consumption:</b> 82 Watts Standby 135 Watts Operation
<b>Circuit Type:</b> Ultra Linear, Push/Pull, Class AB	<b>Resistors:</b> 1% Metal Film	<b>Warm-Up Time:</b> 3 Minutes
<b>Power Output:</b> 60 Watts	<b>Capacitors:</b> Polypropylene, Optional Oil Filled	<b>Break-In Time:</b> 100 Hours
<b>Input Sensitivity:</b> 1 Volt	<b>Power Supply Capacitors:</b> 2 ea 1200 uF @450 Volts	<b>Finish:</b> Black Epoxy Coated Steel Chassis, Optional Black Anodized
<b>Noise and Hum:</b> -80 dB	<b>AC Cord:</b> 3 Conductor, Detachable	Faceplate Chrome
<b>Frequency Response:</b> 18 Hz ~ 30 KHz +/- .75 dB		Plated Stainless Steel Chassis
<b>Tubes:</b> 2 ea 6SL7 Input 4 ea 6550 Output 2 ea CV729 Rectifier
