# SLA-70 MKII

30 Watt/Channel Pure Class A Stereo Amplifier

CARY  
Audio Design

## A New Vision in Music and Technology.

*There are many reasons to own the SLA-70.*

**Performance.** Cary has updated one of the most innovative, popular, and affordable high-end amplifiers ever made. This tube amplifier has led the way in redefining high-end audio since it was first introduced five years ago. With 30 watts of pure Class A power per channel, the SLA-70 MKII delivers singularly clean, crisp sound to the most demanding speakers on the market.

**Craftsmanship.** Like its counterpart, the 70B Signature, the 70 is an exquisite amplifier. From its low profile black chassis, to the large wax-impregnated output transformers, Cary Audio Design has overlooked no detail of construction.

**Pride.** Every time you enjoy your favorite performances, the SLA-70 MKII will remind you of the importance of demanding the best the world of high-end audio can offer.

These are all good reasons to own the SLA-70 MKII. But there is one reason that is more important than any other. It is simply *because you love the music.*

The SLA-70 MKII will change the way you listen to music.

Music is a special relationship, an intimate

experience shared by the listener and the performer. Too many manufactures are indifferent to this relationship. But, for Cary Audio Design, it is their guiding principle, and the reason for their success. Music is emotion, feeling, a way to be transported. And Cary has engineered the SLA-70 MKII to transport you to a place where you experience full, focused lows, sensuous, delightfully detailed mids, clear, soaring highs.

With the SLA-70 MKII you'll feel as though you're *inside* the music.

The best amplifiers are virtually transparent. The SLA-70 MKII is so transparent you'll think it's invisible. It introduces virtually no color at all into the sound. This is because Cary has carefully selected components for their quality and reliability, and uses circuit techniques which eliminate any discernible crossover notch at low levels. Each amplifier is hand wired point-to-point and is burned in at the factory for a 48 hour period. Just unpack, hook up, and enjoy.

Experience the SLA-70 MKII. We believe it will change the way you listen to music. *Forever.*

### Unit Specifications:

<b>Weight:</b> 34 lbs.	<b>Power Transformer(s):</b> 1 ea EI Laminare, 200% Duty	<b>AC Power Requirements:</b> 117/234 Volts
<b>Dimensions:</b> 6" H x 13" W x 12"D	<b>Output Transformer(s):</b> 2 ea EI Laminare, Tetrode, 200% Duty	<b>Consumption:</b> 50-60 Hz
<b>Circuit Type:</b> Push-Pull Pure Class A	<b>Resistors:</b> 1% Metal Film	83 Watts Standby
<b>Power Output:</b> 30 Watts	<b>Capacitors:</b> Polypropylene, Optional Oil Filled	166 Watts Operation
<b>Input Sensitivity:</b> 1.5 Volts	<b>Power Supply Capacitors:</b> 2 ea 1200 uF @450 Volts	<b>Warm-Up Time:</b> 3 Minutes
<b>Noise and Hum:</b> -80 dB	<b>AC Cord:</b> 3 Conductor, Detachable	<b>Break-In Time:</b> 100 Hours
<b>Frequency Response:</b> 10 Hz ~ 30 KHz +/- .75 dB		<b>Finish:</b> Black Epoxy Coated Steel Chassis, Optional Black Anodized Faceplate Chrome Plated Stainless Steel Chassis
<b>Tubes:</b> 2 ea 6SL7 Input 4 ea EL34 Output 2 ea CV729 Rectifier
